Tutorial

Creating a Journal Alert on EBSCOhost
Journal Alerts allow you to set up automatic e-mail notification when a new issue of a specific journal becomes available in an EBSCOhost database.
In order to create Journal Alerts, you must be signed in to your My EBSCOhost personal folder account.
To sign in or create a new account, click the **Sign In** link in the top toolbar.
First, click on the **Publications** button along the top toolbar.
Enter the publication name in the **Browse Publications** field and click **Browse**. Next, click on the title link to view the Publication Details page.
On the publication record, click on **Share** in the upper right corner. In the resulting drop-down menu, click **E-mail Alert** to open the Journal Alert setup window.
Set your alert parameters, add your e-mail address, and click **Save Alert**. You will now be alerted when a new issue becomes available. You can also click the **Advanced Settings** link if you would like to access all of the available alert customization options.
Click the Help link to view the complete online Help system.
